

Progress Report (July – December 2025)

Title of the Project	Meal for Every Child
Thematic Area	Health
Location	Navi Mumbai, Maharashtra
Project Duration	July 2025 – June 2026
Reporting Period	July 2025 – December 2025

Summary

The Meal for Every Child project aims to ensure regular access to nutritious meals for children residing at Swapnalay, a Child Care Institution in Navi Mumbai. During the reporting period (July–December 2025), the project supported an average of 55 beneficiaries daily, including resident children and essential caregiving staff.

Children received four nutritious meals per day—breakfast, lunch, evening snack, and dinner—with packed tiffin's provided for school-going children. Reliance Foundation support enabled consistent meal provision, improved dietary intake, and strengthened basic health monitoring.

Interim outcomes indicate improved energy levels, reduced complaints of weakness and fatigue, better participation in daily routines and school activities, and increased hygiene awareness. Project implementation during the reporting period remained on track and aligned with the approved proposal.

Implementing Organisation Profile

Trikay Care and Creation Association (TCCA) is a registered non-profit organisation working in the area of child welfare and care. TCCA implements the project at Swapnalay, a Child Care Institution operating under the Juvenile Justice (Care and Protection of Children) Act, 2015, and functioning under the directions of the Child Welfare Committee (CWC). The institution is managed by The Jaan Foundation.

Swapnalay serves as a transit and rehabilitation shelter for children referred by the CWC. Admissions and discharges are dynamic, based on statutory orders and rehabilitation plans. TCCA provides structured care, nutrition support, hygiene education, and basic health monitoring to promote the overall well-being of resident children.

Project Need and Rationale

Children entering institutional care often face nutritional deficiencies due to socio-economic vulnerability, neglect, or disrupted caregiving environments. Poor nutrition directly impacts immunity, growth, energy levels, and learning outcomes.

The Meal for Every Child project was designed to address these gaps by ensuring consistent access to balanced meals, supporting improved health, daily functioning, and participation in education, while promoting hygiene and healthy food practices.

Project Objectives

- To provide regular and nutritious meals to resident children and essential caregiving staff
- To improve overall health and reduce nutrition-related deficiencies
- To support daily routines, energy levels, and engagement in education
- To promote hygiene awareness and healthy food habits

Beneficiaries

Direct Beneficiaries during Reporting Period: 55

Activities Undertaken (July–December 2025)

- Daily provision of four meals: breakfast, lunch, evening snack, and dinner
- Packed tiffin's for school-going children
- Preparation and serving of meals following basic hygiene and nutrition standards
- Monthly health observations including appetite, weight trends, and energy levels
- Close monitoring of children showing signs of weakness or nutritional concerns
- Three hygiene and nutrition awareness sessions covering:
 - Handwashing and personal hygiene
 - Importance of balanced meals
 - Healthy daily habits

Caregivers reinforced these practices through daily routines.

Outputs Achieved

- Nutritious meals provided four times daily to all resident children
- Total meals served: 37,440
- Health and nutrition monitoring conducted monthly (6 sessions)
- Hygiene and nutrition awareness sessions conducted: 3
- Uninterrupted service delivery throughout the reporting period

Outcomes Observed

- Improved regularity in meal consumption
- Better energy levels and general well-being
- Reduced complaints of weakness and fatigue
- Improved participation in daily routines and school-related activities
- Increased awareness and practice of hygiene and healthy food habits

Monitoring and Evaluation

- Monthly internal health observations (weight, appetite, energy levels)

- Daily supervision by caregivers and staff
- Regular interaction with children to assess well-being
- Review of attendance and participation in daily routines
- Ongoing refinement of meal planning based on observed needs

Financial Summary (July–December 2025)

Approved Annual Project Budget: ₹ 10,23,825

Funds Disbursed during the Reporting Period: ₹ 5,11,912.50

Funds Utilised during the Reporting Period: ₹ 4,50,292

Risks and Mitigation

Identified Risk	Mitigation Measures
Fluctuating number of resident children	Flexible, need-based planning
Ensuring uninterrupted meal services	Continuous coordination with caregivers and kitchen staff
Individual health variations	Close monitoring and timely follow-up support

Beneficiary and Stakeholder Feedback

Case Study 1: Improved Nutritional Status through Consistent Meal Support

An adolescent girl's weight increased from 44.60 kg in July 2025 to 49.15 kg in December 2025. Caregivers observed improved appetite, energy levels, and participation in daily routines, reflecting the positive impact of sustained nutritional support.

Case Study 2: Enhanced Energy and Engagement

Another adolescent girl recorded a weight increase from 38.70 kg to 45.00 kg during the reporting period. Alongside physical improvement, caregivers noted reduced fatigue and greater engagement in daily activities.

Case Study 3: Gradual Health Improvement

A child weighing 31.85 kg in July 2025 reached 34.70 kg by December 2025. Improved energy levels and consistent participation in routines were observed.

Aggregate Health Observations

Among adolescent girls, improved menstrual regularity and haemoglobin levels were noted based on routine monitoring and available records. These observations are not medical diagnoses but reflect general improvement in nutritional status.

Way Forward (January–June 2026)

- Continued implementation of nutrition-enhanced meal plans
- Tracking of growth and health indicators

Annexure:

Medical check-up and Awareness about hygiene

Food support, birthday and event celebration

A group of students in blue uniforms are sitting in a circle on the floor in a classroom, facing a teacher who is standing at the front. A large screen displays a portrait of a man. The classroom has a wooden desk at the front and a large window in the background.
